TOMORROW'S DINNER

Lima Bean and Tomato Soup
Minute Chopped Steaks on Toast
Whipped Potato
Strawberry (or Orange) Shortcake
Coffee or Tea

**All Measurements Are Level
Recipes Serve Four**

Lima Bean and Tomato Soup
Make this from leftovers: lima beans as follows: Into a 2-qt. saucepan put 2 c. cold lima beans, 1 1/2 c. canned tomato, 1 sliced peeled onion, 5 c. cold water or soup stock, and 1 tsp. sugar and 1 tsp. meat extract. Mix and simmer until soft. Rub through a sieve. Return to the heat. Blend 3 tbsp. flour and 2 tbsp. bacon drippings. Add 1/2 c. of the soup, stir until smooth, return to the pot of soup and stir until it boils. Garnish with croutons or minced parsley.

Minute Chopped Steaks
Purchase 1 lb. first quality chopped beef or order 1 1/2 lbs. round or chuck steak and put it through the food chopper twice. Add 1 tsp. salt and 1/4 tsp. tabasco. Shape into 8 thin round cakes. In a heavy frying pan melt 1 1/2 tbsp. butter or margarine with 1 peeled section garlic to season. Remove the garlic. In this quickly fry the chopped steaks, first on one side until brown, then turn to brown the other. Allow about 5 min. cooking time. Serve topped with garlic butter.

Strawberry or Orange Shortcake
Sift together 2 c. flour, 6 tsp. sugar, 1/2 tsp. salt and 3 tsp. baking powder. Add 4 tbsp. butter or margarine; chop it in with a pastry blender. Beat 1 egg light. Add 1/2 c. milk and stir into the flour mixture. Oil a 9 in. layer cake pan. Spread in the shortcake mixture. Bake about 20 min. in a hot oven, 400 F. Cover with defrosted frozen strawberries, or sliced fresh berries, which have been slightly sweetened, or use 2 1/2 c. sweetened orange sections.

Something Special
These are called coconut jumbles and make for a special dessert. Cream 1/2 c. butter, or any shortening until soft. Add 1 c. sugar, 1 well beaten egg, 2 tsp. milk, 1 tsp. vanilla extract. Sift together 1 1/2 tsp. baking powder, 1/2 tsp. salt and 1 c. flour. Add to first mixture. Mix until smooth. Then add about 1 1/2 c. flour, or enough to make the dough the right consistency to roll. Transfer half the dough to a pastry board or cloth which has been lightly floured. Roll thin and shape into rings with a doughnut cutter. Brush with slightly beaten egg yolk, dust with shredded coconut and place on an oiled cookie sheet or pan. Bake about 8 min. at 375 F.

Canada's North Ready For Trapping Beavers

It's open season for beaver trapping in the James Bay area and Indians in the north have high hopes of getting their share. The beaver provides both treaty and non-treaty Indians with an annual income ranging from \$700 to \$2,000 on government and Hudson's Bay Co. preserves in the James Bay area. To the native who depends solely on trapping, the beaver is the backbone of his existence. The other animals he traps are merely side lines. The beaver population was almost wiped out in the early 1900's but now the population is increasing. Sam Cheena, above, is ready for trapping trip.

MEMO
What's happening in Alberta is good for everyone

What's happening out in Alberta these days? Plenty! New oil is being sought and found. Money's flowing faster. There's lots of activity, lots of opportunity. And as a result all Canadians are better off.

For instance, oil from Alberta's new wells is expected to save 68 million U.S. dollars this year! That's one of the big reasons for Canada's better trade position, one of the reasons we are able to buy more U.S. goods.

The new discoveries have meant lower cost operation in Alberta and Saskatchewan for farmer and industrialist, and this must ultimately benefit all of Canada.

Then, too, it takes a lot of money to find oil and lots more to develop a field once it's found. Two million dollars a week is being poured into oil exploration and development in Alberta today. That spending creates new markets for the things the rest of Canada has to sell.

And finally let's recall that in the war years—and after—we were dependent on foreign oil for roughly 90 per cent of our supplies. This year prairie production should exceed prairie demand. With continued effort and reasonable success it is not too much to hope the men who search for oil will make Canada self-sufficient in petroleum in years to come.

Everywhere in Alberta you hear about new oil discoveries—all the more because they followed the long years when nature baffled the oil seekers. Years when men drilled holes two miles deep and found only water. Years of million-dollar disappointments.

In 1947 the tide turned. First it was the Leduc field... then the Woodbend field... next Redwater... now, still untested by time, other discoveries give new promise and the hope of still greater benefits for all Canadians.

IMPERIAL OIL LIMITED

If you're interested in facts...

Consumption of oil in Canada is the second highest in the world on a per capita basis. United States alone is higher.

Canadians are using twice as much oil as in 1939 and more than three times as much as in 1932.

At the beginning of 1949 Canada was importing 84 per cent of her oil.

During 1948 Imperial Oil drilled a total of 138 wells in its search for oil and in developing the new fields of Alberta.

The oil industry is spending more than \$100 million in exploration and development in Alberta this year.

Bringing you oil is a big job—and a costly one
